### EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 208 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 208

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

You are working for a startup that was officially registered as a business 6 months ago. As your customer base grows, your use of Google Cloud increases. You want to allow all engineers to create new projects without asking them for their credit card information. What should you do?

- A. Create a Billing account, associate a payment method with it, and provide all project creators with permission to associate that billing account with their projects.
- B. Grant all engineers permission to create their own billing accounts for each new project.
- C. Apply for monthly invoiced billing, and have a single invoice for the project paid by the finance team.
- D. Create a billing account, associate it with a monthly purchase order (PO), and send the PO to Google Cloud.

Selected Answer: A

Cloud Billing accounts pay for Google Cloud projects and Google Maps Platform projects.

You might be eligible to switch your account type to monthly invoiced billing if your business meets certain requirements.

These requirements include, but aren't limited to the following:

- You must be registered as a business for a minimum of one year.
- You expect to spend a minimum of \$40,000 a year on Google Cloud.
- Invoiced billing must be available in your country.

<https://cloud.google.com/billing/docs/how-to/invoiced-billing>

So A is the correct answer here.

Selected Answer: A

Option A is the better answer for the given scenario. It allows you to centralize billing and payment management while providing flexibility to project creators. By creating a billing account and associating a payment method with it, you establish a central source for billing and payment for all projects.

Granting project creators permission to associate the billing account with their projects ensures that they can create projects without the need for their individual credit card information. This approach streamlines the process and avoids the hassle of collecting credit card details from each engineer.

Additionally, this option allows for easy monitoring and management of project costs through a single billing account, making it simpler to track expenses and allocate resources effectively.
