You are responsible for a web application on Compute Engine. You want your support team to be notified automatically if users experience high latency for at least 5 minutes. You need a Google-recommended solution with no development cost. What should you do?

- A. Export Cloud Monitoring metrics to BigQuery and use a Looker Studio dashboard to monitor your web application's latency.
- B. Create an alert policy to send a notification when the HTTP response latency exceeds the specified threshold.
- C. Implement an App Engine service which invokes the Cloud Monitoring API and sends a notification in case of anomalies.
- D. Use the Cloud Monitoring dashboard to observe latency and take the necessary actions when the response latency exceeds the specified threshold.
