EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 100 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 100

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Your organization has strict requirements to control access to Google Cloud projects. You need to enable your Site Reliability Engineers (SREs) to approve requests from the Google Cloud support team when an SRE opens a support case. You want to follow Google-recommended practices. What should you do?

- A. Add your SREs to roles/iam.roleAdmin role.
- B. Add your SREs to roles/accessapproval.approver role.
- C. Add your SREs to a group and then add this group to roles/iam.roleAdmin.role.
- D. Add your SREs to a group and then add this group to roles/accessapproval.approver role.

D. Add your SREs to a group and then add this group to roles/accessapproval approver role.
-Google recommendation.

Selected Answer: D

Grant the Access Approval Approver (roles/accessapproval.approver) IAM role on the project, folder, or organization to the principal who you want to be able to perform approvals. You can grant the Access Approval Approver IAM role to either an individual user, a service account, or a Google group.

Go for D

? ? ? upvoted 1 times

? ? **hiranfilho** 2 years, 5 months ago

Selected Answer: D

Answers C and D are correct, but it doesn't say if the SRE already has a group and as it is Google's recommendation to make a group to add users and privileges to the group, the right one is D

It mentioned more than one SRE, so adding the user to group is most suitable approach, Answer is D.

Passed my exams today. Not because just because of the questions I practiced here, but because of you guys, your knowledge and experience and breakdown of questions. Too bad this site can't go legit. It such an wholesome resource.

Some final words... KEEP MOVING FORWARD UNTIL ALL THE QUESTIONS ARE DESTROYED TATAKAE!!!!!!

I've seen about 5 questions which are like this, always asking how to grant access and "follow Google best practice", and every time it's just making sure you know to use a group to control access to resources for users, and not adding users directly to objects.

Remember that keyword, "Google best practice" means "make sure you use a group"
