EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 104 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 104

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Your company set up a complex organizational structure on Google Cloud. The structure includes hundreds of folders and projects. Only a few team members should be able to view the hierarchical structure. You need to assign minimum permissions to these team members, and you want to follow Google-recommended practices. What should you do?

- A. Add the users to roles/browser role.
- B. Add the users to roles/iam.roleViewer role.
- C. Add the users to a group, and add this group to roles/browser.
- D. Add the users to a group, and add this group to roles/iam.roleViewer role.

Correct Answer is (C):

We need to apply the GCP Best practices.

roles/browser Browser Read access to browse the hierarchy for a project, including the folder, organization, and IAM policy. This role doesn't include permission to view resources in the project.

Selected Answer: C

(roles/browser)

Read access to browse the hierarchy for a project, including the folder, organization, and allow policy. This role doesn't include permission to view resources in the project.

<https://cloud.google.com/resource-manager/docs/access-control-proj#browser>

To view, only, "view the hierarchical structure", C. But with browser role they will not be able to view resources, only the structure.

Selected Answer: C

The correct answer is D. Add the users to a group, and add this group to roles/iam.roleViewer role.

This approach follows Google-recommended practices by utilizing IAM groups to manage user permissions and ensure granular control over access to the organizational structure. By adding users to a group and assigning the roles/iam.roleViewer role to the group, you can effectively grant the necessary permissions to view the hierarchical structure while minimizing the scope of access.
