### EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 7 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 7

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Several employees at your company have been creating projects with Cloud Platform and paying for it with their personal credit cards, which the company reimburses. The company wants to centralize all these projects under a single, new billing account. What should you do?

- A. Contact cloud-billing@google.com with your bank account details and request a corporate billing account for your company.
- B. Create a ticket with Google Support and wait for their call to share your credit card details over the phone.
- C. In the Google Platform Console, go to the Resource Manager and move all projects to the root Organization.
- D. In the Google Cloud Platform Console, create a new billing account and set up a payment method.

C is incomplete. Moving projects under an organisation doesn't change their linked billing project.  
<https://cloud.google.com/resource-manager/docs/migrating-projects-billing>

----  
Note: The link between projects and billing accounts is preserved, irrespective of the hierarchy. When you move your existing projects into the organization they will continue to work and be billed as they used to before the migration, even if the corresponding billing account has not been migrated yet.

----  
D is incomplete as well, after setting the billing account in the organisation you need to link the projects to the new billing account.

I agree that neither C or D is correct. I did the cert a month ago and this question was not on it. Although a similar question about how to change the payment method from your own card in your project to to the company's "card". So they might have removed this one.

We need to add a new payment method and need to set that as Primary, post that we need to remove the previous one

"If you want to remove a payment method, you should add a new payment method first."

Refer : <https://cloud.google.com/billing/docs/how-to/payment-methods>

The given answers make D the only possible solution. C can not be right, you all need to look it up here:  
[https://cloud.google.com/resource-manager/docs/project-migration#change\\_billing\\_account](https://cloud.google.com/resource-manager/docs/project-migration#change_billing_account)

This link explains clearly that move a project won't affect billing.

The question is under the organization different projects are maintained the different cloud platforms.all the different project should single corporate bill account instead of the employee billing account. So try to update the corporate bill account details and mark it as primary for the all projects, post that employee account details need to removed. So suitable recomanded option is D

**Selected Answer: D**

Option A is incorrect because you cannot request a corporate billing account by emailing [cloud-billing@google.com](mailto:cloud-billing@google.com). This email address is for general billing inquiries and support.

Option B is incorrect because you cannot create a ticket with Google Support to share your credit card details over the phone. To set up a payment method for a billing account, you must do it through the Google Cloud Platform Console.

Option C is incorrect because moving projects to the root organization will not create a new billing account. You must first create a new billing account and then move the projects to the root organization to ensure that they are all billed to the same billing account.

Therefore, the correct answer is Option D.

[https://cloud.google.com/billing/docs/how-to/manage-billing-account#create\\_a\\_new\\_billing\\_account](https://cloud.google.com/billing/docs/how-to/manage-billing-account#create_a_new_billing_account)

**Selected Answer: D**

The correct answer is D. You have to follow the complete steps to successfully:

1. Create a new Billing Account
2. Move the existing projects into the new billing account
3. Cancel the earlier billing accounts of individual projects

This would meet all the requirements in the question - to centrally have all the projects under a single billing account.

D is correct,

"get-contexts" shows us our Kubernetes cluster contexts, that's right. But the question says that you want to review the cluster itself, so you need to use-context to get into the cluster. Answer A: Using `gcloud config configurations described` will only show you the details of the current configuration, not the Kubernetes Engine cluster of an inactive configuration. Answer B: Using `gcloud config configurations activate` and `gcloud config list` to review the output will only show you the list of configurations and activate one of them, but it won't provide you with the details of the Kubernetes Engine cluster of an inactive configuration. Answer C: Using `kubectl config get-contexts` will only list the available contexts, including their clusters, but it won't provide you with the details of the Kubernetes Engine cluster of an inactive configuration.

? ? **Robot101** 6 months, 3 weeks ago

**Selected Answer: C**

C is correct. Because it is the best practice recommended by google. And D, you cannot have multiple billing account in one project.

? ? **hiromi** 2 years ago

**Selected Answer: D**

D is more complete than C

   upvoted 2 times

  **AwesomeGCP** 2 years ago

**Selected Answer: D**

It's pretty straight-forward: you should establish a new billing account with a company-based payment method. Then set all the projects to use that new billing account.
