EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 166 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 166

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Your web application has been running successfully on Cloud Run for Anthos. You want to evaluate an updated version of the application with a specific percentage of your production users (canary deployment). What should you do?

- A. Create a new service with the new version of the application. Split traffic between this version and the version that is currently running.
- B. Create a new revision with the new version of the application. Split traffic between this version and the version that is currently running.
- C. Create a new service with the new version of the application. Add an HTTP Load Balancer in front of both services.
- D. Create a new revision with the new version of the application. Add an HTTP Load Balancer in front of both revisions.

In my opinion correct answer is B:

https://cloud.google.com/run/docs/rollouts-rollbacks-traffic-migration?utm_campaign=CDR_ahm_aap-severless_cloud-run-faq_&utm_source=external&utm_medium=web

Cloud Run can split traffic between revisions

TAvengeR 3 years, 7 months ago

The google doc link is incorrect. You need to specify CloudRun for Anthos

<https://cloud.google.com/kuberun/docs/rollouts-rollbacks-traffic-migration>

Anyway principles for CloudRun and CloudRun for Anthos are the same. Traffic can be split between multiple revisions. The answer is "B"

AzureDP900 2 years, 4 months ago

B is correct for this scenario, there is no need to create new services

upvoted 2 times

pfabio 2 years, 5 months ago

Selected Answer: B

Cloud Run for Anthos allows you to specify which revisions should receive traffic and to specify traffic percentages that are received by a revision

Canary deployments are a method of releasing software to a subset of users or servers. The plan is to deliver the update to a small selection of servers first, test it, and then roll it out to the other servers.

So it's a Revision or new update or a new version, not a service.
