EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 95 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 95

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

You want to find out when users were added to Cloud Spanner Identity Access Management (IAM) roles on your Google Cloud Platform (GCP) project. What should you do in the GCP Console?

- A. Open the Cloud Spanner console to review configurations.
- B. Open the IAM & admin console to review IAM policies for Cloud Spanner roles.
- C. Go to the Stackdriver Monitoring console and review information for Cloud Spanner.
- D. Go to the Stackdriver Logging console, review admin activity logs, and filter them for Cloud Spanner IAM roles.

Selected Answer: D

D is the only option that talks about the admin activity

Selected Answer: D

Answer A is incorrect because the Cloud Spanner console only shows configurations related to Cloud Spanner instances and databases, but not IAM roles.

Answer B is partially correct in that the IAM & admin console is where IAM policies can be viewed and edited. However, it does not show a history of when users were added to Cloud Spanner IAM roles.

Answer C is incorrect because Stackdriver Monitoring is used to monitor the performance of Google Cloud resources and applications, and does not provide information about IAM role changes.

Overall, the best answer is D, as Stackdriver Logging provides a comprehensive history of all administrative activity logs, including when users were added to Cloud Spanner IAM roles.
