EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 229 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 229

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

You created several resources in multiple Google Cloud projects. All projects are linked to different billing accounts. To better estimate future charges, you want to have a single visual representation of all costs incurred. You want to include new cost data as soon as possible. What should you do?

- A. Fill all resources in the Pricing Calculator to get an estimate of the monthly cost.
- B. Use the Reports view in the Cloud Billing Console to view the desired cost information.
- C. Visit the Cost Table page to get a CSV export and visualize it using Looker Studio.
- D. Configure Billing Data Export to BigQuery and visualize the data in Looker Studio.

Selected Answer: D

Cloud Billing export to BigQuery enables you to export detailed Google Cloud billing data (such as usage, cost estimates, and pricing data) automatically throughout the day to a BigQuery dataset that you specify. Then you can access your Cloud Billing data from BigQuery for detailed analysis, or use a tool like Looker Studio to visualize your data. You can also use this export method to export data to a JSON file.

Answer D

Same answer is for Q-201 but different question parameters (multiple projects, same billing account, dynamically calculated cost visualizations)

Selected Answer: D

A and C are straightaway eliminated.

Cloud Billing Reports displays a chart that plots usage costs for all projects linked to a Cloud Billing account, but projects should be linked to a single Cloud Billing account. So, C is also eliminated.

You can combine Cloud Billing data export to BigQuery with Looker Studio to stay up to date on your Google Cloud costs.
