EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 192 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 192

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

You have created an application that is packaged into a Docker image. You want to deploy the Docker image as a workload on Google Kubernetes Engine. What should you do?

- A. Upload the image to Cloud Storage and create a Kubernetes Service referencing the image.
- B. Upload the image to Cloud Storage and create a Kubernetes Deployment referencing the image.
- C. Upload the image to Container Registry and create a Kubernetes Service referencing the image.
- D. Upload the image to Container Registry and create a Kubernetes Deployment referencing the image.

Selected Answer: D

A deployment is responsible for keeping a set of pods running. A service is responsible for enabling network access to a set of pods.

Selected Answer: D

Keep in mind, in the new exam, it would be rather "Artifact Registry"
