EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 221 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 221

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Your application is running on Google Cloud in a managed instance group (MIG). You see errors in Cloud Logging for one VM that one of the processes is not responsive. You want to replace this VM in the MIG quickly. What should you do?

- A. Use the `gcloud compute instances update` command with a `REFRESH` action for the VM.
- B. Use the `gcloud compute instance-groups managed recreate-instances` command to recreate the VM.
- C. Select the MIG from the Compute Engine console and, in the menu, select `Replace VMs`.
- D. Update and apply the instance template of the MIG.

Selected Answer: B

Answer is B.

B: You can recreate one or more VMs

C: Only option to replace each VMs in MIG

Compare it:

<https://cloud.google.com/sdk/gcloud/reference/compute/instance-groups/managed/recreate-instances>

<https://cloud.google.com/sdk/gcloud/reference/compute/instance-groups/managed/rolling-action/replace>

I think option C is correct, since gcloud CLI might take some extra time to reinitiate the instance, option B looks wrong

Selected Answer: B

B hoga common sense

   upvoted 2 times

  **Ben_oso** 1 year ago

Selected Answer: C

I think its C, because the question talk of "Replace the VM".

In B you recreate the same VM, so i think the C is more sense.
