EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 119 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 119

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

Your company has a large quantity of unstructured data in different file formats. You want to perform ETL transformations on the data. You need to make the data accessible on Google Cloud so it can be processed by a Dataflow job. What should you do?

- A. Upload the data to BigQuery using the bq command line tool.
- B. Upload the data to Cloud Storage using the gsutil command line tool.
- C. Upload the data into Cloud SQL using the import function in the console.
- D. Upload the data into Cloud Spanner using the import function in the console.

Also "different" file formats, this further supports B as the correct choice.

Selected Answer: B

Google Cloud Storage (GCS) is the recommended service for storing unstructured data like files, images, and backups. If you have large quantities of unstructured data in different file formats that need to be processed with ETL (Extract, Transform, Load) transformations and then processed by a Dataflow job, the typical workflow is to store the raw data in Cloud Storage.

Once the data is in Cloud Storage, you can easily access it and perform ETL transformations using Google

The correct answer is B

? ? ? upvoted 1 times

? ? **scanner2** 1 year, 1 month ago

Selected Answer: B

Key term is "unstructured data in different file formats". Except B, remaining options are suitable for structured data. So, correct answer is B.

Selected Answer: B

Option B is correct

Cloud Storage is a scalable and cost-effective object storage service that can hold unstructured data of various file formats. Before performing ETL (Extract, Transform, Load) transformations, it's often beneficial to store the raw data in a centralized location, like Cloud Storage.

Selected Answer: B

Cloud Storage as a datalake

? ? ? upvoted 1 times

? ? **VietmanOfficiel** 2 years, 1 month ago

Answer B :

"large quantity" : Cloud Storage or BigQuery

"files" a file is nothing but an Object

So Cloud Storage is the better option.

Answer is B, Cloud Storage for unstructured data

? ? ? upvoted 1 times

? ? **Rukman** 2 years, 7 months ago

Selected Answer: B

Ans: B

We can upload unstructured data to Cloud storage not to bigquery.
