EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 88 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 88

Topic #: 1

[\[All Associate Cloud Engineer Questions\]](#)

You need to set a budget alert for use of Compute Engine services on one of the three Google Cloud Platform projects that you manage. All three projects are linked to a single billing account. What should you do?

- A. Verify that you are the project billing administrator. Select the associated billing account and create a budget and alert for the appropriate project.
- B. Verify that you are the project billing administrator. Select the associated billing account and create a budget and a custom alert.
- C. Verify that you are the project administrator. Select the associated billing account and create a budget for the appropriate project.
- D. Verify that you are project administrator. Select the associated billing account and create a budget and a custom alert.

I think the answer is A, You can rely on default alert. No need for custom alert
upvoted 48 times

alan9999 4 years ago

Right its not asking to set custom alert

One point - there is no such role as Project Billing Administrator - it should be Project Billing Manager but he can't create budgets, the only one who can - Billing Account Administrator. Nor Project Administrator exists. Very tricky question, maybe the option a wrong, hope smb will catch it on exam and pass some light on real variants.

Eshkrkrkr read the question calmly. The role there is Billing Administrator. Not Project Billing Administrator.

It's more like: "Verify you are the project; billing administrator"
upvoted 12 times

BobbyFlash 3 years ago

I agree. If I'm not wrong, project admin doesn't have billing permissions so C and D discarded. Between A and B, option B looks like it works but we would be creating a budget and alert receiving info about billing as a whole; so A delimits billing for the project you want to get info from.

Ciumela Highly Voted 4 years, 4 months ago

A is correct, as you can set a default alert also on a single project: <https://cloud.google.com/billing/docs/how-to/budgets>

nickyshil 2 years, 2 months ago

why nobody is talking about "set a budget alert for use of Compute Engine services" only.. why not custom alert ?how default alert ?
upvoted 2 times

Romio2023 10 months, 3 weeks ago

Is that not a typo? "*Compute Engine"
upvoted 2 times

mwwoodm 4 years, 1 month ago

Agreed. Per the link included: "To create a budget for your Cloud Billing account, you must be a Billing Account Administrator on the Cloud Billing account." So that eliminates C & D. Then no need for custom alert, eliminating B. The answer is A.

A. Verify that you are the project billing administrator. Select the associated billing account and create a budget and alert for the appropriate project.
upvoted 1 times

jayjani66 1 year, 3 months ago

Answer is B.

Explanation: In Google Cloud, budget alerts are associated with billing accounts, not individual projects. Since all three projects are linked to a single billing account, you need to be the billing administrator to set up a budget and alert for that billing account.

Selected Answer: A

Answer A. Verify that you are the project billing administrator. Select the associated billing account and create a budget and alert for the appropriate project.

In this scenario, you need to create a budget alert for the use of Compute Engine services on a specific project. Since all three projects are linked to a single billing account, you need to make sure that you are the billing administrator for that account. Once verified, you can create a budget and alert for the specific project by selecting the associated billing account and setting the budget and alert for the appropriate project.

Buruguduystunstugudunstuy 1 year, 8 months ago

INCORRECT

Answer B is incorrect because a custom alert is not necessary for this scenario. A budget alert alone is sufficient to notify you when your spending reaches a certain threshold.

Answer C is incorrect because, while a project administrator can create a budget for the project, they cannot set a budget alert. Only a billing administrator has the necessary permissions to create a budget alert.

Answer D is incorrect because a project administrator cannot create a custom alert on the associated billing account. Custom alerts can only be created by billing administrators.

Selected Answer: A

I don't even think there's an option for custom budget alert since all budget alerts are kind of the same and we can only customize (with the actual word "customize") the recipients. A should be correct.

[Removed] 1 year, 10 months ago

I think it's B because you can choose how to get alerts, by mail, slack, phone, etc.

Compute Engineer services, please read as Compute Engine services. Ans is A

upvoted 1 times

Zoze 1 year, 11 months ago

I will choice B, It's clear in the question that he only wants to have a specific budget for the VMs instance and have alert of the cost of these instances go out the budget.

upvoted 1 times

Charumathi 2 years ago

A. is correct,

You can define the scope of the budget. For example, you can scope the budget to apply to the spend in an entire Cloud Billing account, or narrow the scope to one or more projects, and/or one or more services, and/or other budget filters applicable to your Cloud Billing account.
