EXAM ASSOCIATE CLOUD ENGINEER TOPIC 1 QUESTION 232 DISCUSSION

Actual exam question from Google's Associate Cloud Engineer

Question #: 232

Topic #: 1

[All Associate Cloud Engineer Questions]

You recently received a new Google Cloud project with an attached billing account where you will work. You need to create instances, set firewalls, and store data in Cloud Storage. You want to follow Google-recommended practices. What should you do?

A. Use the gcloud CLI services enable cloudresourcemanager.googleapis.com command to enable all resources.

B. Use the gcloud services enable compute.googleapis.com command to enable Compute Engine and the gcloud services enable storage-api.googleapis.com command to enable the Cloud Storage APIs.

C. Open the Google Cloud console and enable all Google Cloud APIs from the API dashboard.

D. Open the Google Cloud console and run gcloud init --project in a Cloud Shell.

Answer B.
As for Firewall, after enabling the compute engine api, firewall can be setup in CLI. The Compute Engine API encompasses the functionality for configuring network resources, including firewalls.

Selected Answer: B

B is correct, need to enable API first thing before you can use any services.
Can be done using Google Console or using CLI.
